Llangollen Landfill Sampling - Phase II

March 15, 1977

Gregory Koltonuk
Water Quality Monitoring Branch (3SA60)

Orterio Villa, Director
Annapolis Field Office (3SA20)

THRU: Larry S. Miller, Chief
Water Quality Monitoring Branch (3SA60)

Enclosed is a follow-up Water Supply request for the Phase II sampling program @ the Llangollen landfill dated 3/7/77. In brief: the one well not sampled during the first go-around (monitoring well #49) shall be sampled; in addition to this one, Water Supply is requesting three additional wells. Enforcement needs no other wells sampled.

The original memorandums from Water Supply (1-24-77) and Enforcement (1-12 and 1-19-77) that I sent to you on 1/27/77 for the first sampling completed on Tuesday 2/22/77 requested "other parameters" in addition to the organics sampling. I understand that none of the "other parameter" work has been completed. This will mean resampling of the previously sampled wells in order to complete the requested analyses as identified in the original memorandums from Water Supply and Enforcement.

Your assistance in this effort would be greatly appreciated; and if there be any questions regarding this please let me know.

Also, there still has been no reply to the January 27, 1977 memorandum in accordance with Gary's memorandum of January 10th (Requests for S&A Assistance). This identification of resources, expenses and trade offs, etc. is still needed.
